**JT2 serie**

- Double balanced articulated arm made entirely of aluminium, which guarantees a fast and precise holes alignment.
- Electric motor with Brushless technology 220v.
- Large range of adjustment of the speed processing according to the tool and the type of material. Double extraction speed (counterclockwise) set to 100% or 50% of Vmax.
- Joystick with control buttons for easy tool alignment and to speed up the execution of the work.
- Minimum noise and low electricity consumption.
- Rotational head can be set by the positioning magnet.
- Balance and fluidity of movement guaranteed by gas springs and adjustable joints mounted on ball bearings.
- Possibility of tapping blind and open holes thanks to the adjustable clutch.
- Ray of work 1300mm.

**Accessories**

- Back for tapping with adjustable clutch.
- Trolley with 2 wheels.
- Trolley with 3 wheels.
- Hydraulic system emergency stop lubrication system.
- Lubrication system automatic top lubrication system.
- Back with check adhesive from 1 to 10 meters.

electrical tapping machine
JT3 serie

- Triple balanced articulated arm made entirely of aluminum, which guarantees a fast and precise holes alignment.
- Electric motor with Brushless technology 220v.
- Large range of adjustment of the speed processing according to the tool and the type of material. Double extraction speed (counterclockwise) set to 100% or 50% of Vmax.
- Joystick with control buttons for easy tool alignment and to speed up the execution of the work.
- Minimum noise and low electricity consumption.
- Rotational head which allows threading in any position. Standard feature.
- Magnet positioning for rapid alignment of the spindle.
- Balance and fluidity of movement guaranteed by gas springs and adjustable joints mounted on ball bearings.
- Possibility of tapping blind and open holes thanks to the adjustable clutch.
